

Sprint 3 Report

Actions to stop doing:

- Working on large features.
 - The MVP is nearly complete, now the project needs to be refined to be user-ready.

Actions to start doing:

- Fixing bugs in the code.
 - There are some small (mainly UI) bugs and they need to be taken care of in order to have an MVP.
- Document more.
 - While we have decent documentation so far, we want to make better setup READMEs and commenting in our code.

Actions to keep doing:

- Have discussions about touching basic functionality code.
 - This will help avoid merge conflicts and ensure nothing gets broken.
- Leaving code reviews on pull requests (comments).
 - This will help to keep quality and clean code in our repository.

Work completed/not completed:

Completed:

- As a user, I want to filter the events by time/date or category so that I can view certain events that fit my schedule or interest me (13 story points).
- As an event organizer, I want to add a photo to my event, so that my attendees will know which place to look for (5 story points).
- As a user, I want the option to sync events with my Google calendar and remind me, so that I will not miss them (8 story points).
- As a user, I want an option to use dark mode and light mode, so that I can adjust brightness to my liking (1 story point).

Not Completed:

- None

Work completion rate:

- Total number of user stories completed: 4
- Total number of estimated work hours: 22
- Total number of days: 14
- Previous sprint user stories per day: 0.29
- Previous sprint work hours per day: 1.57
- All sprints average user stories per day: 0.26
- All sprints work hours per day: 1.6
