Sprint 2 Report

Actions to stop doing:

- Changing critical parts of code without consulting the team.
  - When merging new features sometimes critical parts of the codebase were edited causing serious merge errors and in some cases breaking functionality.

Actions to start doing:

- Have discussions about touching basic functionality code.
  - This will help avoid merge conflicts and ensure nothing gets broken.
- Leaving code reviews on pull requests (comments).
  - This will help to keep quality and clean code in our repository.

Actions to keep doing:

- Having other team members review and merge pull requests.
  - Feedback can be given much easier in this way, and PR's will be looked over more.

Work completed/not completed:

<u>Completed:</u>

- As a user, I want to create an event and have a marker on the map that shows the relevant information so that other users can come and are informed of it (8 story points).
- As a user, I want to delete an event I created so that I can cancel it if necessary (2 story points).
- As a user, I want to RSVP to an event so that the host knows I am coming (5 story points).
- As a user, I want to edit events I have made so that I can fix mistakes (5 story points).
- As a user, I want to input an address for an event so that I can create an event faster (8 story points).

<u>Not Completed:</u>

- None

Work completion rate:

- Total number of user stories completed: 5
- Total number of estimated work hours: 28
- Total number of days: 14
- Previous sprint user stories per day: 0.36
- Previous sprint work hours per day: 2
- All sprints average user stories per day: 0.25
- All sprints work hours per day: 1.61
